(the feet on the arrows should be reversed but I haven't figured that out in lucidchart yet)

-- Create Table statements

```

create table Suppliers (
    sid char(4) not null,
    name text,
    StNumber integer,
    StName text,
    StSuffix text,
    City text,
    State text,
    Zip integer,
    PMTterms text,
    Primary key(sid)
);
  
```

-- Functional dependencies for Suppliers: sid -> name, StNumber, StName, StSuffix, city, state, zip.

```

Create table Orders (
    OrdNo char(4) not null,
    sid char(4) not null,
    Comments text,
  
```

```

        OrdDate          char(8),
    Primary key(OrdNo)
);

```

-- Functional dependencies for Orders: OrdNo -> SID, Comments, OrdDate.

```

Create table OrdContents (
    OrdNo          char(4) not null,
    SKU           char(4) not null,
    QuanOr        integer,
    Primary key(OrdNo, SKU)
);

```

-- Functional dependencies for OrdContents: OrdNo -> SKU  
 SKU -> QuanOR.

```

Create table Clothes (
    SKU           char(4) not null,
    ItemDes       text,
    PriceUSD      text,
    QuantityOH    integer,
    Primary key(SKU)
);

```

-- Functional dependencies for Clothes: SKU -> ItemDes, PriceUSD, Quantity OH

-- Insert Statements

Insert into suppliers(sid, name, StNumber, StName, StSuffix, City, State, Zip, PMTterms)

```

    Values('s001','Kohls','15','Maplewood','Drive','Counselor', 'New Mexico', '87018','3/30');

```

Insert into suppliers(sid, name, StNumber, StName, StSuffix, City, State, Zip, PMTterms)

```

    Values('s002','Gap','37','Atlantic','Avenue','New York', 'New York','11365','2/30');

```

Insert into suppliers(sid, name, StNumber, StName, StSuffix, City, State, Zip, PMTterms)

```

    Values( 's004', 'H&M', '64', 'Glennedale', 'Avenue', 'Sparta', 'New Jersey','07871','4/30');

```

Insert into Orders (OrdNo, sid, comments, OrdDate)

```

    Values('0001', 's002','Everything came quickly and as ordered.','02222015');

```

Insert into Orders (OrdNo, sid, comments, OrdDate)

```

    Values('0002', 's001','Order arrived three days late and was missing items','03052015');

```

Insert into Orders (OrdNo, sid, comments, OrdDate)

```
Values('0003', 's002', 'Everything arrived on time and as ordered.', '04012015');
```

```
Insert into OrdContents (OrdNo, SKU, QuanOr)
```

```
Values('0001', 'i001', '10');
```

```
Insert into OrdContents (OrdNo, SKU, QuanOr)
```

```
Values('0001', 'i002', '5');
```

```
Insert into OrdContents (OrdNo, SKU, QuanOr)
```

```
Values('0002', 'i003', '20');
```

```
Insert into OrdContents (OrdNo, SKU, QuanOr)
```

```
Values('0003', 'i004', '15');
```

```
Insert into Clothes (SKU, ItemDes, PriceUSD, QuantityOH)
```

```
Values('i001', 'medium purple argyle sweater', '24.95', '0');
```

```
Insert into Clothes (SKU, ItemDes, PriceUSD, QuantityOH)
```

```
Values('i002', 'small black hooded zip up sweatshirt', '19.95', '2');
```

```
Insert into Clothes (SKU, ItemDes, PriceUSD, QuantityOH)
```

```
Values('i003', 'large white socks in pairs', '24.95', 4);
```

```
Insert into Clothes (SKU, ItemDes, PriceUSD, QuantityOH)
```

```
Values('i004', 'size 30/30 maroon chinos', '24.95', 1);
```

```
Query to show how many of 'i004' are available for sale:
```

```
Select sum (clothes.QuantityOH, Ordcontents.QuanOr)  
From clothes, OrdContents  
Where clothes.SKU = OrdContents.SKU ='i004'
```
